Why are we doing this

VISION

The vision of the Monument Academy Parent Teacher Organization's Green4Green Campaign is to replace the existing on site dirt field with a usable recreation area that all students will enjoy and have fond memories of their outdoor play time.

MISSION

To create a safe, inclusive and user friendly recreation area for MA students through collaborative efforts by MA's administration, school board, teachers, students, MA PTO and the community

INSPIRATION

The inspiration for the recreation area is the nearly 900 MA students who currently play on a hard packed dirt surface, which restricts the extent to which they are able to play outdoors. The surface becomes unusable after rainy weather resulting in pools of retained water and mud. This adverse situation remains for several days after inclement weather because of poor drainage.

Monument Academy sets the gold standard in providing numerous opportunities for its student to excel academically. The success of MA PTO Green4Green Campaign will enhance MA's ability to offer outdoor recreational areas and most importantly expand the physical, emotional and social opportunities for its students.

PROJECTED RECREATION AREA CONFIGURATION AND DETAILS

Phase 1: Create a 135' by 135' square field over the dirt lot – June 2016 \$125,000

Phase 2: Color seal coat the black top for the basketball court and play areas, paint mural on concrete wall and landscaping of the hillside and north and south sides of the concrete sidewalk

Phase 3: Work with administration to improve the existing playground area
