RECORDS

2010-2021

Approach for Records – Each person is only listed once for any given event/split, with the notion of the “top five athletes” (vs. top five *performances*, since in some cases a single person might dominate the whole list). Top-5 relay times are not merged into the corresponding open events, since only the leadoff leg uses the comparable standing start, but more out of respect to the athletes who volunteered for the open events (especially the 400m).

There are All-Time Records by Grade as well as combined records for all grades. The grade-level record pages do not contain relay **team** performances, since it was very rarely that we ever fielded a team that was entirely made up of athletes from a single grade. However, the individual **splits** from these relays are included.

Automated Timing – Starting in 2018, we went to Fully Automated Timing (FAT) for many of the meets. The automated timing should be the norm going forward. However, FAT will inherently result in slightly slower times, so the old hand-timed records have a slight advantage. Rather than try and figure out the conversion factors and update all the records, the hand-timed entries will be *shown in italics*, and it is left as an exercise to the reader to make any assumptions about relative order of the results based on any correction factor. The assumption is that over time the old hand-timed records will work their way to the bottom of the lists or even fall off entirely.

Content Disclaimer - We keep improving the recording of results each year, so the “holes” in the data this time are fairly minimal. Submission of any missing/additional information is always welcome, and the Yearbook and any records will be amended as needed and the Yearbook(s) republished (electronically). Please send any updates to Tom Eller at teller1210@gmail.com .
